1

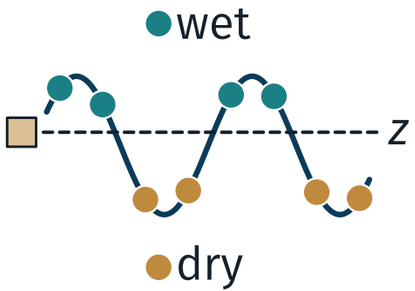

Sentinel-2 data cube

built in the cloud,
10 m, 2023–2025

2

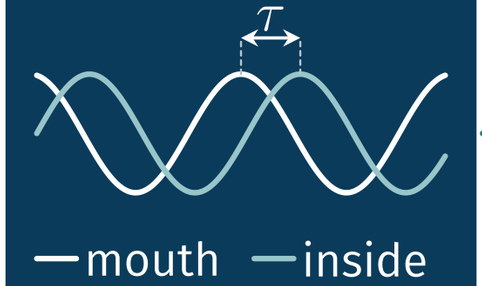

Each pixel: a wet/dry sensor

wet when the tide
is above the pixel

3

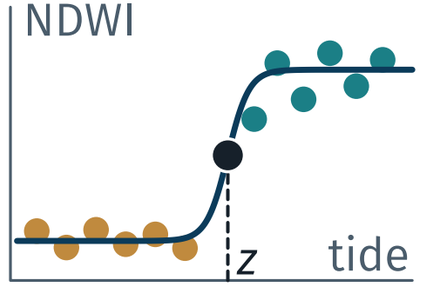

Tidal lag per 3-km section

profiled likelihood,
zero at the mouth

4

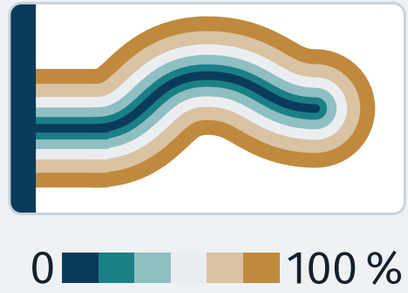

Flooding curve on corrected tide

midpoint = elevation
with its uncertainty

5

Emerged time on corrected tide

habitat base layer
for *Zostera noltei*
